TALNET

ONLINE PERSONAL DEVELOPMENT AND ENRICHMENT PROGRAMME

2021-22 Academic Year

INTRODUCTION

We are aware each student is different as part of our personalised attention education framework. A quality education that prepares specifically for present and, especially future challenges, must recognise these differences and respond appropriately to them. Within the framework of this diversity there is a group of students with specific educational needs that stand out for their high learning potential, which can manifest itself in different ways and in different areas or talents. In some cases, they stand out for how easily they find learning, their ability to generate ideas, their autonomy, precociousness for certain learning, high achievement, their sensitivity...

Detecting these traits early on is essential for their proper development and to foster resources, programmes and methods that respond to their needs and enhance their capacities and abilities.

- **ABOUT:** TALNET is an Enrichment and Personal Development programme that, through different types of activities, aims to enhance personal capacities in general, thinking strategies, self-control and emotional intelligence and self-awareness.
- **WHEN:** TALNET will take place on the second and fourth Saturday of the month, throughout the academic year (October-June) from 10:00 to 13:30.
- **HOW:** Every Saturday the students will carry out two activities / workshops of an hour and a half each, programmed according to the ages and interests of the students.
- **WHO:** Students who are motivated towards new learning and / or are high achievers or talented in Compulsory Secondary Education (ESO).
- **METHODOLOGY:** We will use a diversified personal and creative methodology, which will allow different paces and forms of learning according to the personal characteristics of each student.

The TALNET methodology is based on creativity, which is the most effective for developing problem-solving skills and personal growth. We keep in mind at all times that a fundamental ingredient of creativity is divergent reasoning, which is characterised by the production of a great variety of completely alternative solutions.

Cultivating at all times reflective, critical, analytical thinking that is not limited by expectations, but is distinguished by its originality. Achieving the full development of all their potential and autonomy, thus teaching students to make decisions for themselves

We will offer different activities aimed at students to learn new scientific and technological concepts and at the same time acquire the necessary skills for the development of a balanced and positive personality with basic competencies, which help them to function in society.

Lessons will be taught by specialist professionals, following the Stellar Programme stimulation method for high achievers and the subsequent advice and counselling.

This activity provides students' the opportunity to take part in enriching joint activities with SEK students from schools both in Spain and abroad and attending an annual meeting within the framework of the 2nd International Meeting for Young Talent.

Dr Luz F. Pérez. Director of the Stellar and Talnet Programmes

TIMETABLE

TIMETABLE SATURDAY 1		
GROUPS	10:00 - 11:30 H	12:00 - 13:30 H
TALNET Shared with students of the Stellar Programme	THINK APP Maribel Herranz	VIRTUAL REALITY Anabel Sánchez

TIMETABLE SATURDAY 2		
GROUPS	10:00 - 11:30 H	12:00 - 13:30 H
